Year-Round Material Loading

LeeBoy's versatile 3000C Force Feed Loader is a year-round workhorse, picking up soil, snow, milling or other windrowed material for fast, low cost material loading. The climate-controlled operator's platform and cab enhance safety and comfort while providing superior visibility to the front pickup feeder and rear discharge conveyor. The loader excels at continuous high capacity material loading and offers safe, single or double lane operation in roadway applications.

Multipurpose or Tapered Moldboard

The tapered moldboard allows for efficient pick up of a variety of materials before they move to the feeder paddles that carry the material to the 28' (8.53 m) belt conveyor. The multipurpose moldboard features augers which push material to the feeder paddles. This increases efficiency for operations such as snow removal.

Swivel Conveyor Attachment

The swivel conveyor attachment rotates 180° for discharge of materials to either side of the 3000C Force Feed Loader. This feature allows the receiving truck to travel next to the loader in the same direction as it receives material from the swivel conveyor.
